Lab News

Melissa Campbell was recently awarded an assistantship from the Honors Research Assistantship (HRA) program for her work with the Dental Registry and DNA Repository. The prestigious award grants \$600 to undergraduate students involved in research on a specific project at the University of Pittsburgh. Melissa has been involved with the DRDR since January, and has since then dedicated her time and energy towards subject recruitment and data entry for the project. The DRDR would not function without the hard work of all the undergraduate and graduate student researchers. Congratulations, Melissa!
