Lab News

On January 4th, Dr. Vieira hosted the 2nd SDM Research Scholars Program, aiming to facilitate participation of interested SDM clinical faculty into scholarly activities. The program was created as a way to foster interactions among faculty, and to provide mentorship in developing clinical research studies. This year, 4 faculty members (Drs. Sarah Davis, Karen Nedwick, Michael Dobos, and David Anderson) were involved with the program and participated in a day-long workshop held in the Learning Resource Center. Also participated in the workshop the first group of scholars (Drs. Marnie Oakley, Jean O'Donnell, Christine Wankiiri-Hale, and Maria Tassopoulou-Fishell) as well as faculty that can potentially provide additional support (Drs. James Guggenheimer, Deborah Polk, and Heiko Spallek).
