Lab News

Every year, the International Association for Dental Research (IADR) hosts a conference for researchers all over the globe to present new findings in the dental research field. This year, the conference was held from July 14-17 in Barcelona, Spain. The Vieira Lab presented a total of 6 papers. Dr. Vieira has organized and spoken at the symposium on “New Directions in Cariology Research. The other 6 speakers and paper titles for the conference are listed below.

Ariadne Letra: “MMP and TIMP Polymorphisms in Individuals with/without Cleft Lip/Palate”

Renato Menezes: “Further Evidence of the Involvement of AXIN2 in Cleft Lip/Palate”

Aditi Jindal: “Caries Incidence Is Not Increased in Cleft Individuals From Philippines”

Ida Anjomshoaa: “Aquaporin-5 is Associated with Higher Caries Experience in Turkish Children”

Erika Kuchler: “Dental Caries Experience in Patients with and without Oral Clefts”

Flavia Carvalho: “FAM5C contributes to aggressive periodontitis”
