Lab News

In only 3 months, the article entitled “Different contribution of BRINP3 gene in chronic periodontitis and peri-implantitis: a cross-sectional study” has been reviewed 738 times (about 250 times per month and more than 7 times per day). In this article, there is evidence that the BRINP3 polymorphic variant rs1342913 and low level of BRINP3 expression are associated with peri-implantitis, independently from the presence of chronic periodontitis.
