Lab News

Dr. Vieira is working with Dr. Davies on a project aiming to generate data on the frequency of oral conditions affecting individuals 50 years of age or older. Subjects receive an oral and craniofacial examination including a panoramic radiographic image and an ultrasound of neck structures.

Subjects are not charged for these procedures, which take less than one hour, but there is no compensation for participation.

You can contact Dr. Vieira (412-383-8972) if you are interested in participating or would like to refer someone you believe is eligible.

University of Pittsburgh
School of Dental Medicine

“Oral Health of Seniors”

For Faculty and Students:

Our goal is to generate data on the frequency of oral conditions affecting the elderly. Subjects will receive an oral examination that includes a panoramic radiograph.

If your patient is older than 50 years of age, please consider suggesting her/him to contact us to participate in our study.

Subjects will not be charged for this exam, which takes less than 1 hour.

There is no compensation for participation.

Please tell your patient to contact:
Alexandre R. Vieira, DDS, MS, PhD
Principal Investigator
