ORAL AND MAXILLOFACIAL RADIOLOGY IMAGING SERVICE

University Dental Health Services
A Division of the University of Pittsburgh
School of Dental Medicine
We make life simpler for you

**Interpretation Service**

*If you have the images, we can provide the interpretation only.*

*Patient data are transferred using secured, online service.*

**Fees are very competitive! Call for pricing and how to prescribe a scan.**

---

**QUALITY AND SERVICE**

**New Technology**

Planmeca ProMax CALM analyzer compensates for slight movement during scan.

Carestream 8100 3D with 2D and 3D capabilities, preferred by endodontists.

We calibrate our machines for optimal quality images and accurate measurements.

2D, Intra-oral and extra-oral imaging is also available.

All imaging is accompanied by an interpretation report by a board-certified radiologist.

---

**ORAL AND MAXILLOFACIAL RADIOLOGY IMAGING SERVICES**

Cone Beam Computed Tomography (CBCT) service is now available at University Dental Health Services to help dentists provide cutting edge imaging for their patients.

Revolutionize your practice with CBCT imaging. We are excited to offer you an advanced imaging modality in multiple volume sizes to enhance visualization, diagnosis and treatment planning for your patients.

CBCT is a valuable diagnostic tool for treatment planning in implant dentistry, oral pathology, maxillofacial trauma, TMJ and sinus pathology, orthodontic and orthognathic surgical procedures.

The volumetric data obtained from CBCT scans can be used with third party software for surgical planning.

---

**Other Services**

- CD with a viewer and if requested, another CD with DICOM files for surgical guide construction.
- Direct upload of patient's DICOM files to any surgical guide making company of your choice.
- Free image models with patient scan.
- Detailed report by fax and/or mail. We will call you with any urgent results.
- Our staff are knowledgeable and can assist you with billing.
- We are always happy to discuss a case with you.

---

**Who We Are?**

The imaging service department is staffed by a Medical Radiology Technician, a dental assistant, an Oral and Maxillofacial Radiologist and a board-certified (American board of Oral and Maxillofacial Radiology) Oral and Maxillofacial Radiologist.
