

# Vieira Lab Newsletter

## Lab News

*Dentistry 3000*, an online dental and oral health research journal created by Dr. Vieira to provide a new venue for publication with no costs for authors, has pushed its forth issue. The journal seeks papers on any areas of dentistry. This issue includes seven papers that have been accepted over the past year, they are:

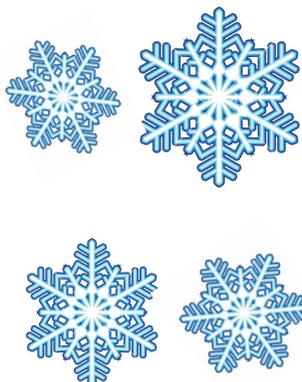

- Orthodontic treatment as a possible trigger of periodontal disease
- Observing Anterior Crowding In a Population Living a Century Ago
- Third Molar Eruption Mechanisms and Patterns
- The effect of polymer burs on microbiological reduction of carious dentin in deciduous teeth: a systematic review
- Prevalence of oral tori among medical and dental Students at the University of the West Indies
- Association of AXIN2 gene polymorphisms with nonsyndromic oligodontia in Turkish families
- Multilevel modeling for dental caries among adolescents in a Brazilian large city

To see the forth issue of *Dentistry 3000*, please visit [dentistry3000.pitt.edu](http://dentistry3000.pitt.edu) For previous issues [click here](#)

*Dentistry 3000* is supported by the University Library Systems, University of Pittsburgh, as part of its D-Scribe Digital Publishing Program, and is cosponsored by the University of Pittsburgh Press. We'd like to thank ULS, the editors, the reviewers, the authors, and everyone else who has made *Dentistry 3000* possible.
