Lab News

The ninth international conference on dental enamel was held at Ridding Park, near Harrogate, Yorkshire, UK October 30th – November 3rd 2016. Full reports of the work presented in the conference will be available at the Frontiers in Physiology this year. The participation of Dr. Vieira in the conference included chairing the Travel Award committee, membership in the international advisory board, obtaining funding through the NIH R13 grant mechanism, and presenting. The presentation is expanded in the Frontiers in Physiology paper entitled *In Vitro Acid-Mediated Initial Dental Enamel Loss Is Associated with Genetic Variants Previously Linked to Caries Experience*. AR Vieira, M Bayram, F Seymen, RC Sencak, F Lippert and A Modesto. The full article can be found [here](#)
