## Lab News

The most popular class taught in the Mobile Science Laboratory from the University of Pittsburgh has caught the news. Skulls borrowed from the School of Dental Medicine are used in an 80 foot tractor-trailer to teach K7-K12 students, in this case of Leetonia, Ohio, about physical characteristics that can help identification and be used for forensic purposes. You can watch the newscast [here](#).

newscast [here](#).

This class was designed by Dr. Vieira several years ago and has been attended by close to 2,000 middle and high school students, the most popular class of the Mobile Science Lab repertoire. The goal of this program is instill the interest in sciences and expose students to an environment different from their classrooms, where learning can be seen as fun and engaging.
