

Vieira Lab Newsletter

Lab News

Among work published between January 2018 and December 2019, the article [On the genetics contribution to molar incisor hypomineralization](#) received some of the most downloads in the 12 months following online publication in the *International Journal of Paediatric Dentistry*. In this paper Dr. Vieira showed that the contribution of genetics to the variation seen in the population of MIH is 20%, by using data from identical twins.
