Costa Mde C, Kuchler EC, Filho PF, Modesto A, Vieira AR. Defining subphenotypes for tooth agenesis: does side matter? *J Clin Pediatr Dent.* 2010 Winter; 34 (2): 169-72

Ferraro M, Vieira AR. Explaining gender differences in caries: a multifactorial approach to a multifactorial disease. *Int J Dent* 2010; doi:10.1155/2010/649643.

## Lab News

A recent publication from the Vieira Lab was the result of a class project of a first year dental student. Maria Ferraro recently published her article, titled "Explaining Gender Differences in Caries: A Multifactorial Approach to a Multifactorial Disease." The work was based on a manuscript that Maria submitted as part of her requirements for the University of Pittsburgh School of Dental Medicine course ORBIOL 5174, Craniofacial Genetics. The work is being published in the *International Journal of Dentistry*. Maria's success with her publication can be used as an example for any students or faculty members that are interested in publishing. The full text of Maria's manuscript can be found here: <http://www.hindawi.com/journals/ijd/2010/649643.html>
