Lab News

There has been a historic effort to gather data from over a million people living in the US to accelerate research and improve health, this is the **All of Us Research Program** objective. The program considers individual differences in lifestyle, environment and biology enabling individualized prevention, treatment and care for all of us. The Vieira lab has joined the effort and in conjunct with the Dental Registry and DNA Repository (DRDR) project will help increase the number of participants recruited to the study. Participation includes sharing information about medical history, taking physical measurements, in addition to blood and urine samples donation. Anyone over the age of 18 who is living in the United States can join the Research Program.

Upcoming Events

Vieira Lab/DRDR Meeting

November 8
10:00 a.m.
414 Salk Pavilion

CCR Seminar

Tuesdays at 1:00 p.m.
